

Welcome to **ActivInspire**

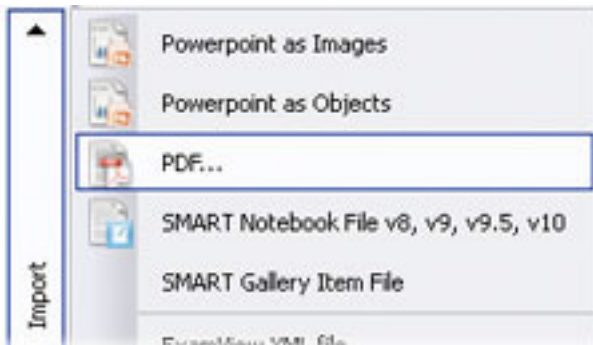

WHAT'S NEW IN V1.2?

Self-Paced Learning with ActivExpression

ActivInspire Professional Edition v1.2 supports the creation and execution of Self-Paced Question Sets for use with ActivExpression.

With Self-Paced Question Sets, learners receive the text of each question on their ActivExpression devices and respond in their own time. All responses and response times are logged and can be displayed dynamically if desired.

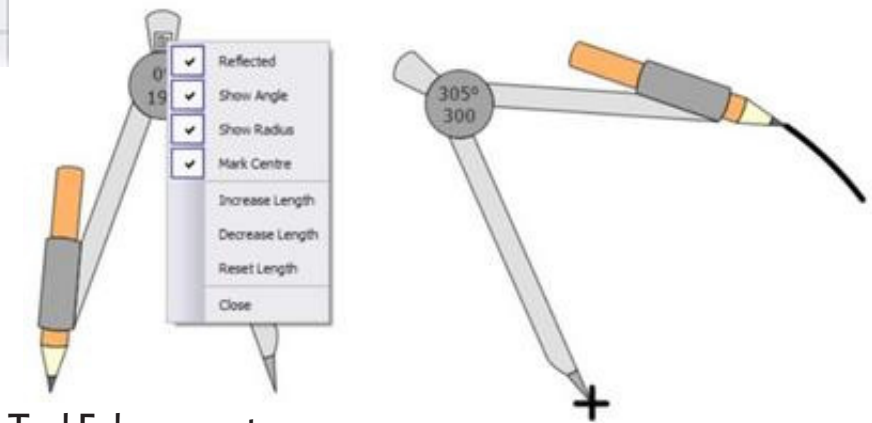

Import from PDF, Digital Camera*, Scanner*, Visual Presenter*

In addition to several other file types available for import in version 1.2, you now have the ability to import from PDF! (File > Import > PDF) Other options for import include: PowerPoint as Images, PowerPoint as Objects, SMART Notebook File, SMART Gallery Item File, ExamView XML File, IMS QTI XML File, and Resource Packs.

You can also insert TWAIN files captured directly by your digital camera, scanner or visual presenter! (Insert > From Scanner/Camera ...) (* Windows only)

Local Resource Search by Keyword

With version 1.2, you can now search your resources to quickly find what you need when developing lessons. Index your resources, type in keywords, choose the resource type you'd like to find, and hit the search button! ActivInspire allows you to search for images, backgrounds, flipcharts and much more.

Tool Enhancements

- 'Show Angle' option added to the redesigned compass and protractor
- Protractor properties saved to user profile
- Area Screen Recorder now implemented on Windows and Mac
- Connectors created on top layer at all times
- The Clock 'Count Up' button can be removed, and the 'Count Down' button can be relabelled as 'Count Down/Up'.
- The clock 'Count Down/Up' dialog can provide an extra combo-box control to provide the option to either Count Down or Count Up.
