

FREE Upgrade to Inspire until Sept 30

Although there are some differences between Personal edition and Professional edition, they are actually installed from the same file. When you install the software, you are installing Personal edition. Professional edition is unlocked by using a serial number.

In order to download and install ActivInspire, you need to log into Promethean Planet (or register first if not already a member) and click on the 'Download ActivInspire' button from the Promethean Planet home page (www.prometheanplanet.com):

Simply click on the link, fill in the necessary forms, and download the ActivInspire files. The option to download the Resource Pack appears on the page immediately after the Inspire Software download begins.

Click on one of the these two options...

Get your Free ActivInspire Resource Pack

- Download your free [ActivInspire Resource Pack](#) - UK MIRROR
- Download your free [ActivInspire Resource Pack](#) - USA MIRROR

Ensure that you save both files rather than running, especially the resource pack and ensure that you know where the resource pack is saved. If you are on a Windows machine, install the .exe file. If on Mac, open the .dmg and run the two .pkg files. Note that you must install the driver separately on the Mac.

Open the software. If you have an ActivInspire serial number, input it here, read and accept the terms, click OK. If you do not have an ActivInspire serial number, ensure that your hardware is connected and you should see an Upgrade Now button (pictured).

If this button is not available or says 'Buy Professional edition' your hardware is not detected; verify that the ActivManager is installed and that your hardware is attached to your computer.

If necessary, feel free to refer to the knowledgebase for troubleshooting help (<http://www.prometheankb.com>) or contact the Promethean Asia Pacific technical support:

0800 448 611 (NZ : 1pm - 9pm)
Calls via land-lines only.

At the very bottom of this same web-page, there is an option to generate a new serial number for ActivInspire using your existing Hardware or Software serial number.
